Pellet Air

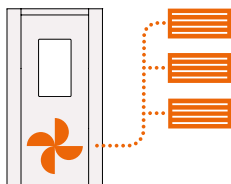

Cadel offre una gamma completa di stufe a pellet ventilate dotate di camera stagna per un maggior rendimento e minor consumo. Tutti i modelli di stufe Pellet Air sono certificati Classe Energetica A+, 4 stelle Aria Pulita™ o 5 stelle, 7 stelle Flamme Verte e sono riconosciuti come idonei a ricevere il rimborso Conto Termico.

Cadel offers a comprehensive range of ventilated air pellet stoves with a sealed chamber for greater efficiency and reduced consumption. All Pellet Air Stove models are conform with the EcoDesign 2022 directives.

Cadel propose une gamme complète de poêles à granulés à air ventilé équipés d'une chambre étanche pour un meilleur rendement et une moindre consommation. Tous les modèles de poêles Pellet Air sont certifiés 7 étoiles Flamme Vert et sont reconnus comme éligibles au crédit d'impôt. En outre, un an après leur introduction, ils sont référencés CSTB.

Cadel bietet eine vollständige Palette von Pelletöfen mit Gebläse und abgedichteter Brennkammer zur Gewährleistung von höherer Leistung und geringerem Verbrauch. Alle Pelletofen-Modelle der Linie Air sind Bimsch 2015 (Regensburg, München, Stuttgart, Aachen) und Klima Energiefonds zertifiziert.

Pellet Air Plus

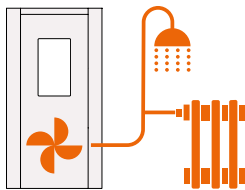

Per riscaldare più ambienti della casa in modo economico e pratico, la stufa a pellet canalizzabile Air Plus di Cadel è lo strumento ideale. Grazie al sistema di canalizzazione è possibile distribuire il calore rapidamente e in modo omogeneo anche in altre stanze. Tutti i modelli di stufe Pellet Air Plus sono certificati Classe Energetica A+, 4 o 5 stelle AriaPulita™, 7 stelle Flamme Verte e sono riconosciuti come idonei a ricevere il rimborso Conto Termico.

A Cadel Air Plus ductable pellet stove is the ideal tool to heat up several rooms in the house in a cost-effective and convenient way. Thanks to its ducting, you can distribute heat quickly and evenly in other rooms as well. All Pellet Air Plus Stove models are conform with the EcoDesign 2022 directives.

Pour chauffer plusieurs pièces de la maison de manière économique et pratique, le poêle à granulés canalisable Air Plus de Cadel est l'instrument idéal. Grâce au système de canalisation, il est possible de distribuer la chaleur rapidement et de façon homogène dans d'autres pièces aussi. Tous les modèles de poêles Pellet Air plus sont certifiés 7 étoiles Flamme Vert et sont reconnus comme éligibles au crédit d'impôt. En outre, un an après leur introduction, ils sont référencés CSTB.

Der kanalisierbare Pelletofen Air Plus von Cadel ist die ideale Lösung, um auf sparsame und praktische Weise mehrere Wohnräume zu erwärmen. Die Kanalisierung ermöglicht es, die Wärme rasch und gleichmäßig auch auf andere Räume zu verteilen. Alle Pelletofen-Modelle der Linie Air Plus sind Bimsch 2015 (Regensburg, München, Stuttgart, Aachen) und Klima Energiefonds zertifiziert.

Pellet Hydro

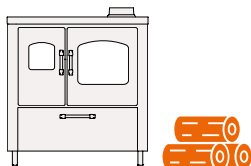

Le termostufe Cadel sono la soluzione ottimale per l'impianto di riscaldamento domestico, riscaldando rapidamente l'acqua dei termosifoni. Sono pratiche ed economiche ed uniscono la funzionalità ad un'estetica accattivante. Alcuni modelli sono disponibili nella versione H₂O: dotate di un apposito kit queste termostufe a pellet possono produrre acqua calda sanitaria.

Cadel thermostoves are an excellent solution for domestic heating systems, since they quickly heat water in the radiators, they are convenient and cost-effective, and combine functionality with a charming design. Some models are available in the H₂O version: equipped with a special kit, these pellet thermostoves can produce domestic hot water.

Les thermo-poêles Cadel sont une excellente solution pour le chauffage domestique, car ils chauffent rapidement l'eau des radiateurs, ils sont pratiques et économiques et allient fonctionnalité et aspect attrayant. Certains modèles sont disponibles dans la version H₂O : équipés d'un kit spécial, ces thermo-poêles à pellets peuvent produire de l'eau chaude sanitaire.

Die Thermoöfen von Cadel sind eine optimale Lösung für Wohnungsheizanlagen. Sie sorgen für eine schnelle Erwärmung des Wassers in den Heizkörpern, sind praktisch und wirtschaftlich und verbinden Funktionalität mit attraktiver Ästhetik. Einige Modelle sind auch in der Version H₂O erhältlich: Mit einem speziellen Bausatz ausgestattet können diese Pelletöfen auch das Warmwasser liefern.

Wood

Conformi alle normative ambientali più severe, i prodotti a legna Cadel a libera installazione e da incasso uniscono il riscaldamento domestico, la versatilità installativa e l'estetica elegante. Grazie ad attente soluzioni costruttive, questi prodotti non necessitano di ulteriori kit per l'inserimento all'interno di un mobile cucina e le finiture curate permettono di poterle installare liberamente in qualsiasi ambiente.

Compliant with the strictest environmental regulations, Cadel's free and recessed installation wood products combine home heating with versatile installation and elegant aesthetics. Thanks to meticulous construction solutions, these products do not require additional kits for insertion in kitchen units and are well finished, which allows them to be easily installed in any room.

En conformité avec les réglementations environnementales les plus strictes, les produits à bois Cadel autonomes et encastrables allient le chauffage domestique, la polyvalence d'installation et l'esthétique élégante. Grâce à des solutions de construction soignées, ces produits ne nécessitent pas de kits supplémentaires pour l'insertion dans un meuble de cuisine, et les finitions raffinées permettent de les installer librement dans n'importe quelle pièce.

Die Holzgefeuerten Geräte von Cadel zur freistehenden Installation und zum Einbau vereinen in sich das Heizen der Wohnung, die Flexibilität bei der Installation und ein elegantes Design. Dank ihrer besonderen Bauart ist bei diesen Geräten kein zusätzlicher Bausatz für den Einbau in eine Küchenzeile erforderlich, und durch die edlen Oberflächen ist die Installation freistehend in jedem beliebigen Raum möglich.

Il piacere della legna

La nostra gamma si arricchisce con l'aggiunta delle stufe a legna, che rendono l'atmosfera sempre accogliente.

- Protagonista in ogni ambiente, grazie a linee semplici ed eleganti.
- Autenticità del calore, godendo dell'esperienza visiva e sonora di un fuoco scoppiettante.
- Possibilità di scelta tra cucine e stufe a legna, disponibili anche in versione ventilata, per adattarsi ad ogni esigenza.

Our range is enriched by wood stoves, which create a consistently welcoming atmosphere.

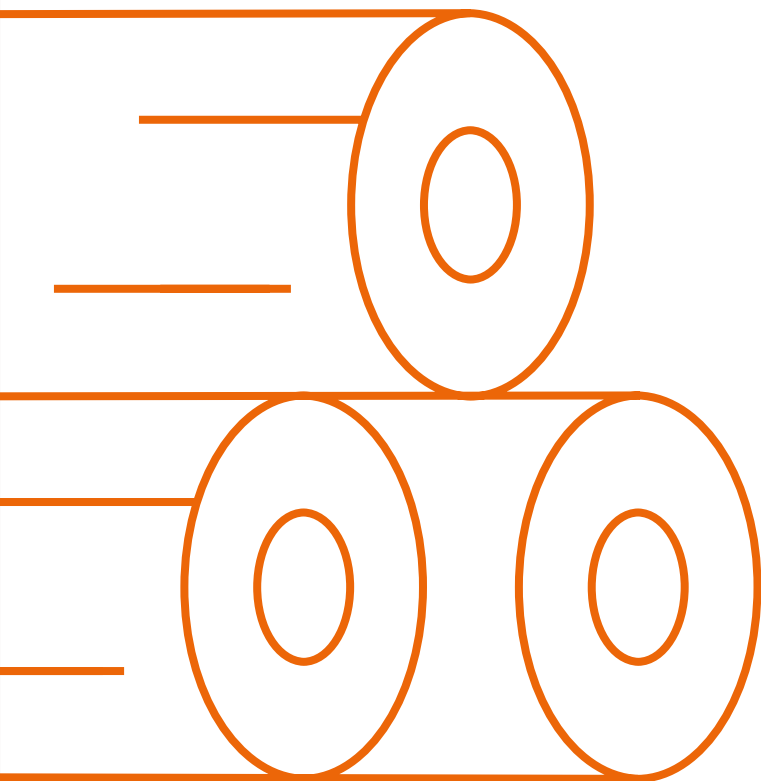

- Perfect match to any space, thanks to simple and elegant lines.
- Genuine warmth, enjoying the vision and sound of a crackling fire.
- Our wood models are also available in a ventilated version, to suit every need.

Notre gamme est enrichie de poêles à bois qui donnent toujours une accueillante atmosphère.

- Protagoniste dans chaque pièce, grâce à des lignes simples et élégantes.
- Authenticité de la chaleur, en profitant de l'expérience visuelle et sonore d'un feu crépitant.
- Nos modèles à bois sont également disponibles en version ventilée, pour s'adapter à chaque besoin.

Unser Sortiment wird durch die Zugabe von Holzöfen bereichert, die eine stets einladende Atmosphäre schaffen.

- Protagonist in jedem Raum, dank einfacher und eleganter Linien.
- Authentische Wärme, die visuelle und akustische Erfahrung eines knisternden Feuers genießen.
- Auswahl zwischen Holzherden und -öfen, auch in einer belüfteten Version erhältlich, um allen Anforderungen gerecht zu werden.

Tecnologie

Airtech

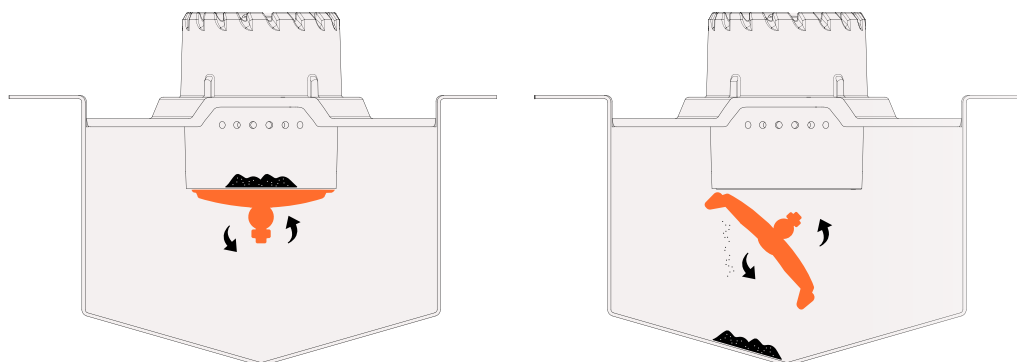

L'innovativo **braciere autopulente** della linea Pellet Air/Air Plus svolge le necessarie operazioni di pulizia braciere in modo automatico, garantendo sempre l'ottimale funzionamento della stufa e diminuendo la frequenza della pulizia manuale.

The innovative **self-cleaning brazier** of the Pellet Air/Air Plus line performs the necessary brazier cleaning automatically, always guaranteeing optimal operation of the stove and reducing the frequency of manual cleaning.

Le **brasero autonettoyant** innovant de la ligne Pellet Air/Air Plus effectue automatiquement le nettoyage nécessaire du brasero, garantissant toujours un fonctionnement optimal du poêle et réduisant la fréquence des nettoyages manuels.

Die innovative **selbstreinigende Brennschale** der Linie Pellet Air/Air Plus führt die notwendige Reinigung der Brennschale automatisch durch, so dass ein optimaler Betrieb des Ofens stets gewährleistet ist und die Häufigkeit der Reinigung von Hand reduziert wird.

Idrotech

Idrotech è l'innovativo sistema di **pulizia automatica** della linea Pellet Idro, che asporta automaticamente i depositi di cenere nel braciere evitando la pulizia giornaliera manuale del focolare. La cenere viene raschiata meccanicamente a intervalli regolari, rilevando eventuali intasamenti. In questo modo la combustione è sempre perfetta ed efficiente.

Idrotech is the innovative **automatic cleaning system** of the Pellet Idro line, which automatically removes ash deposits in the brazier, avoiding daily manual cleaning of the firebox. The ash is mechanically scraped at regular intervals, detecting any clogging. In this way, combustion is always perfect and efficient.

Idrotech est le système innovant de **nettoyage automatique** de la ligne Pellet Idro, qui élimine automatiquement les dépôts de cendres dans le brasero, évitant ainsi le nettoyage manuel quotidien du foyer. Les cendres sont raclées mécaniquement à intervalles réguliers, ce qui permet de détecter tout colmatage. De cette façon, la combustion est toujours parfaite et efficace.

Idrotech ist das innovative **automatische Reinigungssystem** der Linie Pellet Idro, das die Ascheablagerungen im Feuerraum automatisch entfernt und die tägliche Reinigung von Hand der Brennschale überflüssig macht. Die Asche wird in regelmäßigen Abständen mechanisch abgeschabt, um eventuelle Verstopfungen zu beseitigen. Auf diese Weise ist die Verbrennung immer perfekt und effizient.

Go Fast

Sistema costituito da una candeletta/resistenza in ceramica che garantisce un'**accensione più rapida del pellet** e un consumo di elettricità inferiore rispetto alle tradizionali resistenze in metallo. Questa tipologia di resistenza ha inoltre una maggiore durata nel tempo grazie alla migliore tenuta all'ossidazione e alla corrosione naturale e chimica.

System consisting of a ceramic type glow plug/resistor that guarantees **faster pellet ignition** and lower electricity consumption than the conventional metal resistor. This type of resistor also has a longer service life thanks to better resistance to oxidation and to natural and chemical corrosion.

Système constitué d'une bougie de préchauffage/résistance de type céramique qui garantit un **allumage plus rapide du pellet** et une consommation d'électricité inférieure par rapport aux résistances traditionnelles en métal. Ce type de résistance a par ailleurs une plus grande durée dans le temps grâce à la meilleure résistance à l'oxydation et à la corrosion naturelle et chimique.

Das System besteht aus einer keramischen Zündkerze/Widerstand, die eine **schnellere Zündung der Pellets** und einen geringeren Stromverbrauch als herkömmliche Metallwiderstände gewährleistet. Diese Art von Widerstand hat zudem eine längere Lebensdauer, da sie besser gegen Oxidation und natürliche und chemische Korrosion beständig ist.

Tecnologie

Flexit

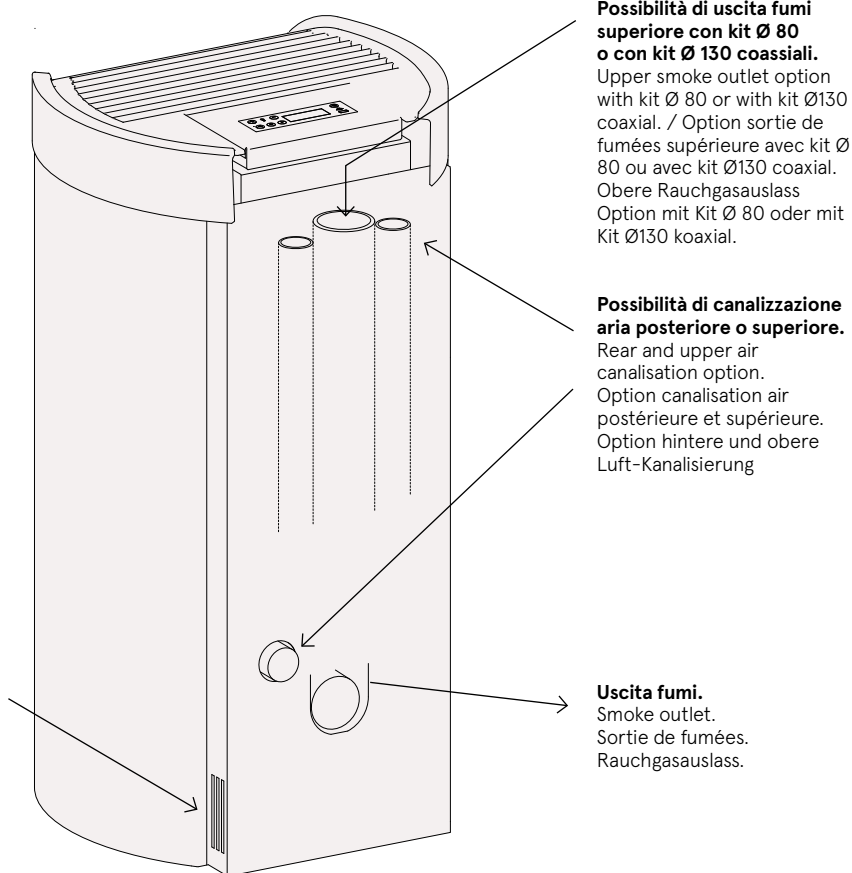

La tecnologia Flexit garantisce un'ottima **flessibilità in termini di installazione**, sia per quanto concerne l'uscita dei fumi (possono essere posteriori, superiori, superiori-concentriche) che quelle d'aria calda canalizzabile (posteriori o superiori).

The Flexit technology guarantees excellent **flexibility in terms of installation**, with regards to smoke outlet – which can be rear, top, top-concentric – as well as with regards to ductable hot air (rear or top).

La technologie Flexit garantit une excellente **flexibilité en termes d'installation**, aussi bien en ce qui concerne les sorties des fumées (elles peuvent être postérieures, supérieures, supérieures-concentriques) que celles de l'air chaud canalisable (postérieures ou supérieures).

Die Flexit-Technologie bietet eine hervorragende **Flexibilität bei der Installation**, sowohl hinsichtlich des Rauchgasabzugs (hinten, oben, oben-konzentrisch) als auch bezüglich des kanalisierbaren Auslasses von Warmluft (hinten oder oben).

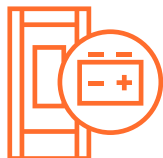

Possibilità di uscita fumi superiore con kit Ø 80 o con kit Ø 130 coassiali.
Upper smoke outlet option with kit Ø 80 or with kit Ø130 coaxial. / Option sortie de fumées supérieure avec kit Ø 80 ou avec kit Ø130 coaxial. Obere Rauchgasauslass Option mit Kit Ø 80 oder mit Kit Ø130 koaxial.

Possibilità di canalizzazione aria posteriore o superiore.
Rear and upper air canalisation option. Option canalisation air postérieure et supérieure. Option hintere und obere Luft-Kanalisierung

Uscita fumi.
Smoke outlet. Sortie de fumées. Rauchgasauslass.

Sui modelli Plus ventilazione laterale di serie. / Standard side ventilation on Plus Models. Ventilation latérale standard sur les modèles Plus. Standard seitliche Belüftung bei Plus Modellen.

Ups ready

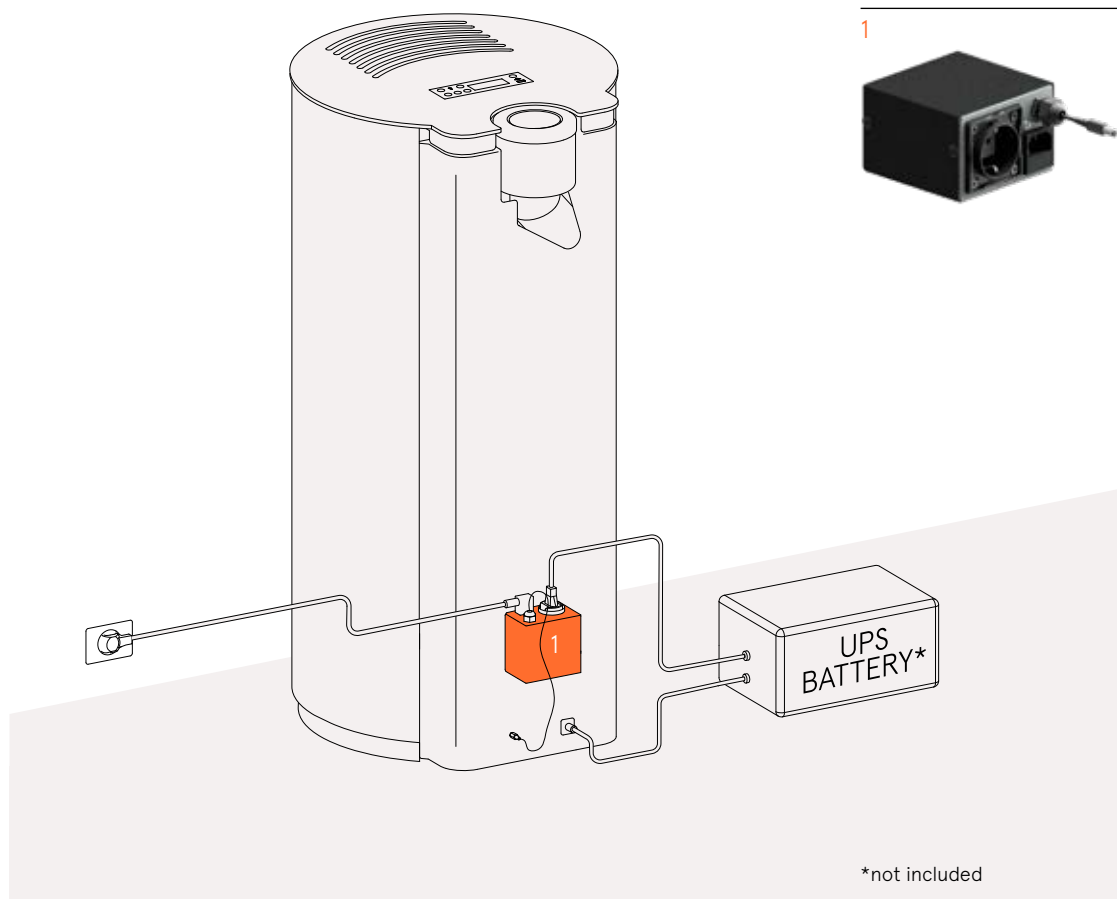

Accessorio per predisporre la stufa al **collegamento con una batteria di backup esterna** (non inclusa), per garantire un'alimentazione continua e la massima protezione durante lo spegnimento della stufa in caso di blackout.

Accessory to prepare the stove for **connection to an external buffer battery** (not included), to ensure continuous power supply and maximum protection during stove shutdown in the event of a power failure.

Accessoire permettant de préparer les poêles au **branchement à une batterie de secours externe** (non incluse), afin de garantir une alimentation continue et une protection maximale pendant l'arrêt du poêle en cas de panne de courant.

Zubehör, um den Ofen für den **Anschluss an eine externe Pufferbatterie** (nicht im Lieferumfang enthalten) vorzubereiten, um eine kontinuierliche Stromversorgung und maximalen Schutz beim Abschalten des Ofens im Falle eines Stromausfalls zu gewährleisten.

Plus Cadel

Comfort mode

Spegne automaticamente i ventilatori quando la stufa è al minimo (potenza 1), per garantire la **massima silenziosità**. La tecnologia Comfort Mode è attiva di default su tutte stufe. Nei modelli delle linee Air Plus e Idro questa funzione è disattivabile direttamente dal menù del display.

It automatically switches off the fans when the stove is idling (power 1), to ensure **maximum silence**. Comfort Mode technology is active by default on all stoves. In models of the Air Plus and Idro lines, this function can be deactivated directly from the display menu.

Il éteint automatiquement les ventilateurs lorsque le poêle fonctionne au ralenti (puissance 1), afin de garantir un **maximum de silence**. La technologie Comfort Mode est activée par défaut sur tous les poêles. Dans les modèles des lignes Air Plus et Idro, cette fonction peut être désactivée directement à partir du menu d'affichage.

Er schaltet die Gebläse automatisch ab, wenn der Ofen auf Mindestleistung läuft (Leistung 1), um einen sehr **leisen Betrieb** zu gewährleisten. Die Technologie Comfort Mode ist bei allen Öfen standardmäßig aktiviert. Bei den Modellen der Linien Air Plus und Idro kann diese Funktion direkt über das Displaymenü deaktiviert werden.

Ventilatori indipendenti

Grazie al sistema di canalizzazione dell'aria, con le stufe Air Plus è possibile distribuire il **calore in modo omogeneo in più stanze**. A seconda delle esigenze abbiamo stufe canalizzabili a due o tre uscite: tutti i ventilatori di canalizzazione possono essere gestiti in modo autonomo.

Independent fans

Thanks to the air ducting system of the Air Plus stoves, heat can be evenly distributed in several rooms. Depending on your needs, we have ductable stoves with two or three outlets: all fans can be controlled separately.

Ventilateurs indépendants

Grâce au système de canalisation de l'air, les poêles Air Plus permettent de distribuer la chaleur de façon homogène dans plusieurs pièces. En fonction des besoins, il est possible d'opter pour un poêle canalisable à deux ou trois sorties : tous les ventilateurs peuvent être gérés de manière autonome.

Unabhängige Gebläse

Die Kanalisierung ermöglicht es bei den Air Plus Öfen, die Wärme rasch und gleichmäßig in mehreren Räumen zu verteilen. Je nach Bedarf bieten wir Öfen mit zwei oder drei Luftauslässen an: Hier können alle Gebläse unabhängig gesteuert werden.

Camera stagna

Stufe a pellet **totalmente ermetiche** rispetto all'ambiente d'installazione: prelevano l'aria di combustione dall'esterno e non dal locale in cui sono installate. Meno emissioni, più sicurezza, maggior rendimento.

Sealed chamber

Pellet stoves that are completely sealed in relation to the room of installation: they draw combustion air directly from outdoors and not from the room they are installed in.

- Fewer emissions
- More safety
- Greater efficiency

Chambre étanche

Ces poêles à pellets sont parfaitement hermétiques par rapport à l'environnement d'installation : ils prélèvent l'air de combustion de l'extérieur directement et non pas du local dans lequel ils sont installés.

- Moins d'émissions
- Plus de sécurité
- Meilleur rendement

Hermetische Brennkammer

Vollkommen gegen die Installationsumgebung abgedichtet: Die Verbrennungsluft wird direkt von außen angesaugt, nicht aus dem Raum, in dem der Ofen installiert ist.

- Weniger Emissionen
- Mehr Sicherheit
- Höherer Wirkungsgrad

5 stelle

Cadel rispetta lo schema italiano di **certificazione D.M. 186**, che valuta le stufe in base al rendimento energetico e alle emissioni prodotte. Raggiungono la classificazione a 5 stelle secondo il D.M. 186, le stufe, gli inserti a pellet e prodotti a legna che garantiscono emissioni di polveri ridotte dell'80% rispetto agli apparecchi che hanno ottenuto 1 stella.

Cadel complies with the Italian **M.D. 186 certification** scheme, which evaluates stoves according to their energy efficiency and emissions. Stoves, pellet inserts, and wood products guaranteeing dust emissions reduced by 80% compared to 1-star appliances are awarded the 5-star classification in accordance with M.D. 186.

Cadel respecte les critères italiens de **certification D.M. 186**, qui évalue les poêles en fonction de leur efficacité énergétique et de leurs émissions. Les poêles, inserts à granulés et produits à bois qui garantissent des émissions de poussières réduites de 80 % par rapport aux appareils ayant obtenu 1 étoile obtiennent la classification 5 étoiles selon le Décret ministériel 186.

Cadel erfüllt die italienischen Anforderungen des Zertifizierungssystems nach dem italienischen **Ministerialerlass 186**, das Öfen nach deren Energieeffizienz und erzeugten Emissionen bewertet. Mit der 5-Sterne-Klassifizierung nach dem italienischen Ministerialerlass 186 garantieren Öfen, Pelleteinsätze und Holzprodukte eine Reduzierung der Staubemissionen um 80% im Vergleich zu 1-Sterne-Geräten.

● Wi-Fi & Bluetooth

Easy Connect Plus

Per una stufa sempre connessa e intelligente

Con l'app **Easy Connect Plus**, e le tecnologie **Wi-Fi** e **Bluetooth** integrate, puoi accendere, programmare, controllare e spegnere tutte le stufe CADEL direttamente dal tuo smartphone, ovunque tu sia. In una sola schermata puoi controllare e gestire le funzioni principali, impostando tempi e temperatura desiderata per ottimizzare i consumi e migliorare il comfort.

For a smart stove connected at all times

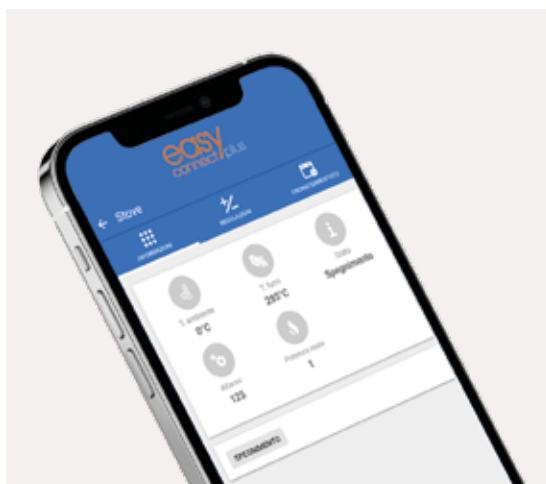

Thanks to the **Easy Connect Plus** app, and the built-in **Wi-Fi** and **Bluetooth** technologies, you can turn on, set up, control and turn off all CADEL stoves easily using your smartphone – wherever you are. From a single screen, you can access and control the main features and set on/off times and the desired temperature for optimal consumption and greater comfort

Pour un poêle toujours connecté et intelligent

Grâce à l'application **Easy Connect Plus** et aux technologies **Wi-Fi** et **Bluetooth** intégrés, vous pouvez allumer, programmer, contrôler et éteindre tous les poêles CADEL depuis votre smartphone, où que vous soyez. Une seule page vous permet de contrôler et gérer les fonctions principales, régler les durées et la température souhaitée, afin d'optimiser les consommations et améliorer le confort.

Für einen stets verbundenen und intelligenten Ofen

Mit der App **Easy Connect Plus** und den integrierten **WLAN** - und **Bluetooth**-Technologien können Sie alle Öfen von CADEL direkt von Ihrem Smartphone einschalten, programmieren, steuern und ausschalten, wo immer Sie sich gerade befinden. Von einer einzigen Ansicht aus können Sie die wichtigsten Funktionen steuern und verwalten und die Betriebszeiten und die gewünschte Temperatur einstellen. So können Sie den Verbrauch optimieren und den Wärmekomfort nach Ihren Wünschen gestalten.

Informazioni

Una panoramica sullo stato di funzionamento della stufa, in relazione alle funzioni e regolazioni attive.

Informations

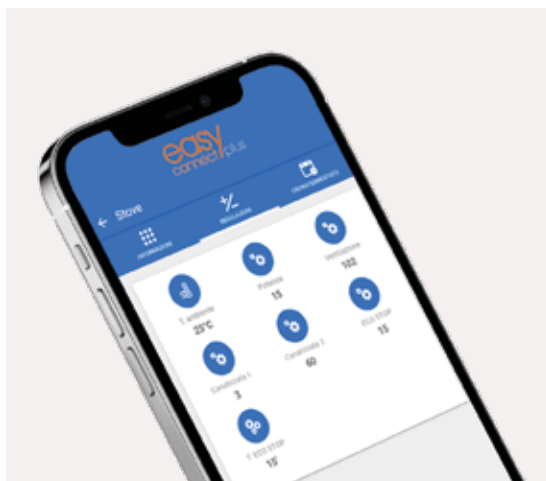

Un aperçu de l'état de fonctionnement du poêle, en ce qui concerne les fonctions et réglages activés.

Information

An overview of the stove's operating status in relation to active functions and adjustments.

Informationen

Eine Übersicht über den Betriebsstatus des Ofens je nach den aktivierten Funktionen und Regulierungen.

Regolazioni

Regolazione potenza, temperatura ambiente, canalizzazione, ventilazione e Eco Stop. Nelle stufe idro controllo della temperatura dell'acqua per Caldaia e Puffer.

Réglages

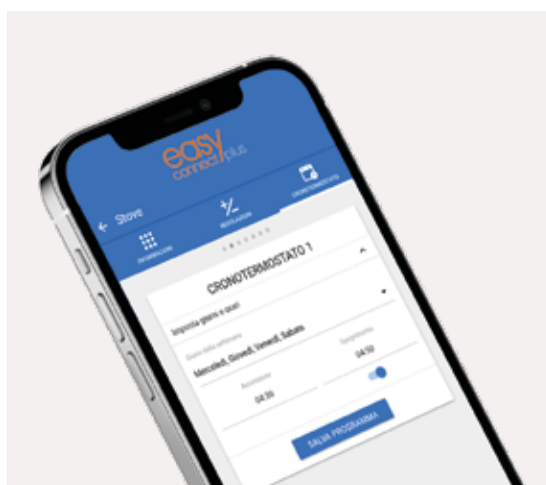

Réglage de la puissance, de la température ambiante, des canalisations, de la ventilation et de la fonction Eco Stop. Contrôle de la température de l'eau de la chaudière et du ballon tampon des poêles hydro.

Adjustments

Power, room temperature, ducting, ventilation and Eco Stop adjustment. Boiler and Puffer water temperature can be controlled in hydro stoves.

Regulierungen

Regulierung der Leistung, der Raumtemperatur, der Luftkanalisierung und der Ventilation sowie Eco Stop. Bei den wasserführenden Öfen Temperaturkontrolle von Kessel und Pufferspeicher.

Cronotermostato

Programmazione per l'accensione e lo spegnimento della stufa in base alle esigenze di comfort.

Thermostat programmable

Programmation pour allumer et éteindre le poêle en fonction des besoins de confort.

Programmable thermostat

Programme the stove to switch on or off as needed for your comfort.

Zeitthermostat

Programmierung zum Ein- und Ausschalten des Ofens je nach gewünschtem Wärmekomfort.
